

Serving the Community

Sounds like a big job, doesn't it? It is—but not a very hard one for us. It would be if our policy were merely to sell merchandise.

But our policy is to serve the community.

To do this we must have merchandise of a different nature than the store which merely sells. Our goods must be unquestionable; the kind we know will serve and satisfy you consistently.

Our patrons know this—know our merchandise—know our guarantee—know us. That makes buying considerably easier for them and serving easier for us.

Get to know us—take advantage of our pleasant efficient service—it pays.

GOOD USE FOR A ROAD DRAG

Implement is Light, Easily Handled and Should Be Worked Soon as Possible After Each Rain.

There exists a prevailing opinion in the minds of those who have used the King road drag that the persistent use of this simple drag will do the ordinary earth roads more good for the amount of time and labor required than any other method of working ever proposed. Some of the best earth roads have been made good by the use of this simple implement. In fact, some advocates of the drag claim that the trustees of many townships could well afford to sell the heavy road machines to a junk man and invest the proceeds in a number of split-

Perspective View of Splitlog Drag.

log drags. Sporadic use of the splitlog or similar drag or the like use of any road-working implement will not make bad roads good. The drag is light and easily handled and should be used as soon after each rain as the condition of the surface will permit. The job was quickly finished and the results are surprising where the dragging is carried on throughout the year. Possibly the most marked improvement from the use of the road drag will result from the early spring dragging.

BUILDING MORE GOOD ROADS

America Now Has 6,000 Miles More of Improved Highways Than France—Total Now 31,000 Miles.

According to the Good Roads Year Book of the American Highways association, recently issued, America now has 6,000 miles more of good roads than France, the total for this country now amounting to 31,000 miles.

Of this 6,000 miles were built in 1912 and about 6,000 in 1914, making a total of over one-third of the entire mileage of the good roads of the country.

New Jersey was the pioneer state to provide state aid for public highways in 1891, and Massachusetts and Connecticut soon followed, but it is only during the last ten years that the state-aid policy has been in effect to any considerable extent.

PHASES OF ROAD PROBLEM

Those Interested in Work Will Find Joint Congressional Committee Report Quite Handy.

Persons interested in the good roads problem, either from the engineering or the legislative standpoint, will find the report of the joint congressional committee on federal aid to good roads a convenient source of information. It not only contains the most extensive data ever published on this subject, but contains a bibliography which gives a list of books, pamphlets and speeches on all phases of the good roads problem. The report is printed as house document 1510, Sixty-third congress, third session, and copies may be secured by application to members of congress.

Do Road Work Early.

For good roads the work should be done in the spring and early summer, if possible. Roads worked in the late fall don't get time to settle before winter, consequently are rough and uneven all winter. Do the road work early.

For Best Results.

The fruit and vegetable garden require richest soils and best culture. On all farm work it pays best for work done, and suffers most from neglect.

A Damp Week

The past week has been a rather damp one. According to the government gauge, we had a rainfall of 3.12 inches last Friday and Saturday. Monday was a typical summer day, but the sky has been overcast ever since. Wednesday night there was a rainfall of .43 of an inch, making a total of over three and a half inches since our last issue. It is raining at the time this is written. This rain was not particularly needed at the time, and may delay the maturing of feed crops, but it will be the proper thing for wheat that has been sown and will put the ground in line shape for fall plowing.

J. H. Kane, formerly a switchman in the local yards, left Saturday for Dalt, Texas. Mr. Kane was thinking of being reinstated, and in case of such an event he will return to Liberal.

Postmaster Irvin made a business trip to Meade Tuesday.

A. W. Lawder, one of Texas county's good farmers, transacted business in the city Monday.

Aubrey Wright, of Tyrone, spent Saturday and Sunday in Liberal visiting his parents.

LeRoy Gardner and Loyd Boles left Wednesday for Wichita, where they will continue their studies in business college.

FOR SALE—Five passenger Hupmobile in first-class condition. Will trade for lighter car. Box 592, Liberal, Kansas.

Notice

The County Commissioners will hold their regular meeting on Monday, October 4. All bills against the county should be filed not later than Saturday, October 2.

ABE K. SROUFER,
County Clerk.
